

HANGMAN

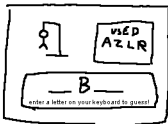

Concept Sketches

by Eli Lambrych

This is the title screen. It will be shown when the game is initially loaded.

Pressing the "Play" button with the mouse will start the game.

This is the main layout of the game. You can guess a letter by entering it on your keyboard.

Used letters get shown in the top right. Letters that are in the word replace underscores that represent the length of the word.

This is the GAME OVER screen. If you run out of attempts, this screen is shown. By pressing the "try again" button with the mouse, you can play the game with a different randomly generated word.
